

UAS INSTRUCTOR

Train the operators who fly the mission.

ABOUT KLINK DRONE INTERNATIONAL

Klick Drone International is a defense technology company building modular, NDAA-compliant UAS systems for DoD and allied forces. We engineer drone platforms designed for distributed, high-tempo operations — built for the Indo-Pacific, sourced without adversarial compromise. We are a defense technology company with dual-theater supply chain in the US and factory operations in the Philippines, and every person we bring on has a direct impact on what we ship.

THE ROLE

You'll develop and deliver training programs covering UAV flight operations, mission procedures, maintenance, and repair. Your students will be operators and technicians who need to perform under pressure. You'll make sure they're ready.

RESPONSIBILITIES

- Plan and conduct hands-on UAV flight training for new and experienced operators
- Instruct on drone operations, mission procedures, and safety protocols
- Teach drone maintenance, field repair, and troubleshooting techniques
- Develop and refine training materials, curricula, and assessments
- Track student progress and adjust instruction to meet performance standards
- Coordinate with engineering and operations teams to keep training current

WHAT WE'RE LOOKING FOR

- Demonstrated experience operating UAV/drone systems
- Ability to teach — you can break down complex technical skills clearly
- Strong safety discipline and the ability to enforce it in training environments
- Organized, with the ability to manage training schedules and documentation
- Clear communicator — written and verbal

NICE TO HAVE

- Formal instructor training or certification
- Military aviation or UAS operations background
- Experience with drone maintenance and repair
- Curriculum development or technical writing experience

WHAT WE OFFER

- Build a training program from the ground up
- Work directly with cutting-edge UAS platforms
- Competitive compensation
- Long-term growth opportunity as our training operations expand

APPLY

Send your CV and a short note on your background to careers@klickdrone.com

We read every application. Philippines-based candidates only at this time.
