

# MANUFACTURING TECHNICIAN

*Precision work. Real impact. Every part counts.*

---

## ABOUT KLICK DRONE INTERNATIONAL

Klick Drone International is a defense technology company building modular, NDAA-compliant UAS systems for DoD and allied forces. We engineer drone platforms designed for distributed, high-tempo operations — built for the Indo-Pacific, sourced without adversarial compromise. We are a defense technology company with dual-theater supply chain in the US and factory operations in the Philippines, and every person we bring on has a direct impact on what we ship.

## THE ROLE

You'll work on the factory floor — assembling components, running quality checks, and supporting production operations. This is foundational work that determines whether our systems perform when it matters.

## RESPONSIBILITIES

- Assemble drone components and systems according to specifications
- Perform quality control inspections at key production stages
- Operate hand tools and equipment safely and precisely
- Identify and flag defects or inconsistencies in the production process
- Support general operations and maintain a clean, organized workspace

## WHAT WE'RE LOOKING FOR

- Reliable — you show up, you follow through
- Strong attention to detail and commitment to quality
- Ability to follow technical instructions and safety protocols
- Manual dexterity and comfort working with hand tools
- Effective team communicator

## NICE TO HAVE

- Manufacturing or factory floor experience
- Background in assembly, quality control, or production processes
- Technical troubleshooting experience
- Precision work or skilled trades background

## **WHAT WE OFFER**

- Stable employment in a growing, mission-driven company
- Competitive compensation
- Safe, professional work environment
- Training and development opportunities

---

## **APPLY**

Send your CV and a short note on your background to [careers@klickdrone.com](mailto:careers@klickdrone.com)

*We read every application. Philippines-based candidates only at this time.*
